### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John T. Callahan on January 15, 2009 at 8:50 AM ET. The application has been amended as follows:

(1) Delete Claims 5 & 6

2. The following is an examiner's statement of reasons for allowance:

Independent claim 1 recites a two-layered olefin-based resin pellet wherein the core of the pellet contains an insecticide, inorganic filler, metal soap, and a resin with high solubility for the insecticide and the outer coating (sheath) of the pellet contains a resin with low solubility for the insecticide.

The closest prior art references disclosed below do not teach the core-sheath arrangement of the pellet claimed above.

Japanese patent document JP-08-302080 teaches a resin composition that comprises an insecticide and two olefin-based resins, one with high solubility for the insecticide and one with low solubility. JP-08-302080 uses the combination of two resins with differing solubilities to effect slow release of the insecticide from the resin composition, thereby increasing the long-term efficacy of the resin composition. JP-08-

302080 does not teach the metal soap and inorganic filler, nor does it teach pellets with a core-sheath arrangement of the resins.

US Patent 6,193,990 teaches resin pellets containing insecticide, metal soap and inorganic filler. US 6,193,990 teaches that the metal soap and filler provide control over the release rate of the insecticide from the resin. US 6,193,990 does not teach coating a second resin with different solubility for the insecticide onto the pellet.

US Patents 5,627,218 and 6,986,945 both teach resin pellets containing two resins in a core-sheath structural arrangement; however, neither teach including insecticides nor provide sufficient motivation for incorporating their structural elements into an insecticidal/resin pellet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R. Lea whose telephone number is (571) 270-5870. The examiner can normally be reached on Mon-Thu 7:30-5:00 ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (571)272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
